The difference MOLDED Makes

At Integrity Fusion, our goal is to provide the highest quality products to the industry, and to our customers. This philosophy has been applied to our MJ Accessory Kits, as the gland rings come standard with a Fusion Bonded Epoxy coating that is far superior to the industry standard Black Asphaltic coating, which tends to begin showing signs of rust shortly after installation.

In addition, for sizes 14" and larger, we only offer the heavy duty C-110 gland rings to ensure the best performance possible.
